Volta Centravac

Volta Centravac have a range of machines to suit all situations. Don't just buy a ducted vacuum system for your home. Make sure you have the right size machine.

cleaner

Ask a Volta Dealer to calculate which machine in the range is right for you. While you are there ask about the no bag, self cleaning filter - the easy to clean bin collection system. Have you heard about the new serenity quiet machines?

Professional Installation or do it yourself

The Volta Ducted Vacuum System can be installed by professional Installers or can be purchased as a DIY kit. An inspection on site, or of your house plans means we can give you a guide as to the relevant costs for materials and installation.

Based on hose lengths and positioning of furniture and house construction, all inlet locations are selected in consultation with the customer and one of our Representatives.

The power unit connects to the wall inlets in the house with a special vacuum pipe. The machine starts vacuuming when the hose end is inserted into the inlet, activating a 24 volt wire system that runs from each inlet to the machine.

Remember! It is important to select the right size machine for the amount of pipe required to reach all the calculated point locations. Volta Ducted Systems can be installed in new or existing homes.

Volta Power Units are usually installed in garages, however it is not unusual to have them on an outside wall with a canopy, or if the building permits, under the house.

healthier environment

New home installation

Where does the dirt go?

Nearly all Volta ducted vacuum systems use a bin system for collecting the dirt. Simply unclip the bin and empty the contents in to a rubbish bag or perhaps in to the garden compost. The cyclonic action of the machine, combined with the high filtration, self cleaning filter, means never having to buy vacuum bags again. The filter works so well, outside venting is not required.

Existing home installation

Is there less suction power at the furthest point?

Distance is not a factor for the suction levels with a Volta machine when one of our representatives selects the right machine for your home.

The right machine combined with high suction levels, removes more dirt and debris from inside your home to an outside location, which means cleaner and healthier living.

Easy to empty bin

VOLTA MACHINES

all come with 2** or 5 year warranty parts & labour
